

ASHISH KUMAR MAURYA

B.Tech in Computer Science & Engineering (Artificial Intelligence)

Lucknow, UP, India • +91 6387727879 • am0008474@gmail.com • linkedin.com/in/ashish-maurya-cse • github.com/am0008474-beep

PROFESSIONAL SUMMARY

Driven and analytical Computer Science undergraduate with specialization in **Artificial Intelligence** at Babu Banarasi Das University. Solid foundation in **Python, Machine Learning pipelines, Computer Vision, and Core Computer Science fundamentals**. Hands-on experience developing end-to-end predictive models, NLP classifiers, and computer vision systems with a strict focus on quantifiable accuracy and clean architecture. Seeking an **AI / Software Engineering Internship** to contribute to high-impact engineering teams.

TECHNICAL SKILLS

Programming Languages: Python (Proficient), C++, SQL (MySQL), Core Java (Basics), JavaScript (Basics)
AI, ML & Data Science: Scikit-Learn, NumPy, Pandas, Matplotlib, Seaborn, TensorFlow/Keras (Basics), OpenCV, NLP (TF-IDF, NLTK)
Frameworks & Tools: Streamlit, Flask, RESTful APIs, Git, GitHub, VS Code, Google Colab, Jupyter Notebook, Linux / Bash
Core Computer Science: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Relational Databases, DBMS

EDUCATION

Babu Banarasi Das University (BBDU) — Lucknow, UP Graduation Expected: 2028 / 2029
Bachelor of Technology (B.Tech) in Computer Science and Engineering (Artificial Intelligence)
• **Relevant Coursework:** Data Structures & Algorithms, Artificial Intelligence, Database Management Systems (DBMS), Object-Oriented Programming in C++, Operating Systems, Linear Algebra, Probability & Statistics.
Intermediate / Senior Secondary (Class XII - Science / PCM) UP / CBSE Board
Completed with strong academic background in Higher Mathematics, Physics, and Computer Science foundations.

TECHNICAL PROJECTS

Smart Healthcare Risk Predictor & Diagnostic App [Project Repo ↗] Python, Scikit-Learn, Streamlit, Pandas
• Engineered an end-to-end Machine Learning web application predicting early cardiovascular and diabetes risks from clinical patient data.
• Implemented full data preprocessing pipeline including missing value imputation, feature scaling with **StandardScaler**, and correlation heatmaps.
• Trained and evaluated **Random Forest, Logistic Regression, and XGBoost** models, hyperparameter tuning to reach **91.8% accuracy**.
• Deployed an interactive web dashboard on **Streamlit Cloud** delivering real-time patient risk evaluations with sub-250ms response latency.
Real-Time NLP Customer Sentiment & Review Classifier [Project Repo ↗] Python, NLTK, Scikit-Learn, Flask, TF-IDF
• Developed a Natural Language Processing system classifying raw user feedback into Positive, Negative, or Neutral sentiment tiers.
• Cleaned and normalized **10,000+ unstructured product reviews** via tokenization, lemmatization, stopword removal, and TF-IDF n-gram vectorization.
• Integrated trained Naive Bayes and Linear SVM models with a lightweight **Flask RESTful API** for automated inference pipelines.
• Designed an intuitive dashboard allowing product teams to analyze feedback sentiment trends and polarity metrics in real-time.
Automated Vision-Based Attendance & Face Recognition System [Project Repo ↗] Python, OpenCV, Haar Cascades, SQLite
• Designed a computer vision system that detects faces from live webcam feeds in real time and automatically logs verified timestamps.
• Integrated a localized **SQLite database** to record attendance data, eliminating proxy attendances and cutting logging overhead by **70%**.
• Implemented visual feedback overlays with bounding boxes, confidence score indicators, and anti-spoofing logic for robust verification.

CERTIFICATIONS & KEY ACHIEVEMENTS

• **Machine Learning Foundations & Supervised Learning:** Completed hands-on coursework in classification, regression, and model evaluation metrics.
• **Python for Data Science & Machine Learning:** Certified in end-to-end data manipulation with Pandas, NumPy, and Scikit-Learn.
• **Core Algorithmic Foundations:** Active practitioner of Data Structures & Algorithms in C++ and Python (Arrays, Strings, Recursion, Time & Space Complexity).
• **Applied AI Engineering:** Built and deployed 4+ end-to-end predictive and computer vision applications with verifiable metrics.
• **Campus Engagement:** Active contributor in Babu Banarasi Das University Coding Club; collaborated on peer AI workshops and tech symposiums.
